MOS Differential Pair

Schematic

Equations

Equation	Conditions	Notes
$v_{G1} = V_{CM} + \left(\frac{v_{id}}{2}\right)$		
$v_{G2} = V_{CM} - \left(\frac{v_{id}}{2}\right)$		

Notes

Term	Description
V_{CM}	Common-mode input. Average of v_{G1} and v_{G2}.
v_{id}	Differential input. Difference between v_{G1} and v_{G2}.
